**original patent application number 20333 for improvements in** The basic principle of the electrical spark ignition system has not changed for over 75 years. Both systems control a low voltage primary circuit through an ignition coil which will Sentech cable, an original patent Therefore, the resistive effect that is effective on low frequencies is improved by the inductive effect. **Ignition system - Wikipedia** A trembler coil or vibrator coil is a type of high-voltage ignition coil used in the ignition system of early automobiles, most notably the Benz Patent-Motorwagen and The trembler coil was a device called a Ruhmkorff or induction coil, widely A significant difference from modern ignitions is in the strength and number of **Technical informations SENTECH** An ignition system generates a spark or heats an electrode to a high temperature to ignite a fuel-air mixture in spark ignition internal combustion engines oil-fired and gas-fired boilers, rocket engines, etc. The widest application for spark ignition internal combustion engines is in In this development, the induced current in the coil in the magneto also flows **original patent application number 20347 for improvements in or** ORIGINAL PATENT APPLICATION NUMBER 20,347 FOR IMPROVEMENTS IN OR RELATING TO TREMBLER INDUCTION COIL IGNITION SYSTEMS : **James Herbert Smith: Books 7.5x11** Complete specification for patent application together with drawings. IN OR RELATING TO TREMBLER INDUCTION COIL IGNITION SYSTEMS Operation of ignition coils in the spark-ignition engine. 4 ficant European volume applications. original equipment quality. Ignition coils in the ignition systems of modern cars generate field generates a high induction voltage in the primary winding. the ratio of number of secondary windings to primary windings. **Induction coil - Wikipedia** An induction coil or spark coil is a type of electrical transformer used to produce high-voltage Today its only common use is as the ignition coils in internal combustion Because of the large number of turns in the secondary coil, the secondary . Maynooth and improved by William Sturgeon and Charles Grafton Page.
