

# Logans Landscaping: Foundations for Multiplication (Math Masters: Operations and Algebraic Thinking)

Real-life situations and relatable narratives guide math students through the fundamentals of algebra, which is an essential part of second-grade math. Readers will learn the skills needed to fluently add and subtract, while also building a foundation for the more complex skills that will be needed at higher levels of education. Engaging visuals complement high-interest topics, while visually appealing designs help to make the math concrete. Readers follow Logan and his family's landscaping business as they learn about arrays. This volume meets CCSS Math Standard 2.OA.C.4.
