Concepts and Images is the result of twenty years of teaching at Harvards Department of Visual and Environmental Studies in the Carpenter Center for the Visual Arts, a department devoted to turning out students articulate in images much as a language department teaches reading and expressing one self in words. It is a response to our students requests for a handout and to 1 our colleagues inquiries about the courses : Visual and Environmental Studies 175 (Introduction to Design Science), YES 176 (Synergetics, the Structure of Ordered Space), Studio Arts 125a (Design Science Workshop, Two-Dimensional), Studio Arts 125b (Design Science Workshop, Three-Dimensional),<sup>2</sup> as well as my freshman seminars on Structure in Science and Art.
